

# PALACOS<sup>®</sup> MV

New name, same product!

PALAMED<sup>®</sup>  
▶ PALACOS<sup>®</sup> MV

As from February 1<sup>st</sup>, 2010 the name of the Heraeus' primary bone cement is changing from PALAMED<sup>®</sup> to PALACOS<sup>®</sup> MV (medium viscosity). The name change will be done to increase product transparency for our customers. In the future all bone cements for primary arthroplasty will be known by the name PALACOS<sup>®</sup>, followed by a suffix indicating the viscosity. All cements are based on the same proven ingredients and are available with the addition of Gentamicin as well.

## What stays the same:

Same product: same proven ingredients, same composition

Available with and without antibiotics

Manufacturer/producer (Heraeus Medical GmbH)

Pack sizes

## What changes:

New Name: PALACOS<sup>®</sup> MV

REF Number

# PALACOS<sup>®</sup> MV

Bone cements for primary arthroplasty

Product	Composition	Contents	REF <sup>Old</sup> PALAMED <sup>®</sup>	REF <sup>New</sup> PALACOS <sup>®</sup> MV
PALACOS <sup>®</sup> MV	Medium-viscosity bone cement	1x40	66017786	66031982
		2x40	66017784	66031984
PALACOS <sup>®</sup> MV+G	Medium-viscosity bone cement with gentamicin	1x20	66017783	66031996
		2x20	66017782	66031998
		1x40	66017780	66031993
		2x40	66017779	66031995
		1x60	66017781	66032000

Please note that we will successively introduce an unified ampoule monomer liquid for Heraeus bone cements. This is a pure name change, no composition change.
